Airlines

We are able to write airline business as a lead or following market from our Lloyd's platform. Our business ranges from international flag carriers to regional airline operations, and we offer bespoke policies and high levels of service to meet the needs of our brokers and clients.

Airports

We look to provide terms on a wide range of exposures, including air traffic control and refuelling operations. The airport book consists of a wide spread of risks, from international airports through to smaller domestic exposures.

Products

We consider both small companies with limited exposures and major multinational entities, incorporating many different lines of Aviation business.

War

The syndicate currently enjoys a well earned reputation as a market leader in this class. We will write Aviation Hull War in conjunction with the excellent service provided by our Marine team.

General Aviation

We are happy to quote for a lead portion or to support following market terms, considering both fixed and rotor wing business. Additionally we offer terms for Hull Deductible and War risks for this class of business.

Hull Deductible

We can offer lead terms and also offer quotes that are packaged with our Airline and General Aviation quotations in order to deliver a complete insurance solution to our clients and brokers.

Claims

Our claims team work with both the underwriting and in house wordings team, in order to provide a full reinsurance service.
