Product Contamination

The safety and quality of a product is at the forefront of a brand and irreparable damage can be done with just the smallest of errors in the manufacturing process. We can help to protect against sullied or maliciously tampered products causing harm and subsequently protecting the company's revenue, balance sheet and customer contracts.

Auto

Our recall liability insurance aims to ensure that the manufacturer can recover their costs and expenses in the event that their product is withdrawn. It is suited for manufacturers, distributors and importers of component parts.

Food & Beverage

Our first party recall for consumer goods aims to protect manufacturers, importers, wholesalers and retailers from damages caused by products found to be contaminated. It is designed for topical and ingestible products for human consumption.

Kidnap and Ransom - Corporate and Individual & Family

It is estimated that there were more than 100,000 kidnappings of locals and foreigners around the world in 2013. This is a problem unlikely to cease as today's world increasingly requires business operations and traveling in and to remote or unsettled regions. Without addressing this threat, companies and their employees could be exposed to disastrous financial, reputational and social consequences.

Marine

For vessels transiting or operating in higher threat regions. Coverage can be purchased with corporate cover to provide complete protection of employees whether working on vessels, travelling, or working overseas.

Non Marine

This is for kidnappings and ransoms that do not occur while on water. We provide coverage to businesses looking to protect employees, and to any High Net Worth looking to protect themselves and their Families from harm.
